

General Setup

1. Clone or download the repository
2. Install dependencies: `npm install`
3. Install Vue CLI: `npm install -g @vue/cli`
4. Upgrade Vue plugins to latest version: `vue upgrade`
5. Open Vue UI: `vue ui` (opens in your browser)
6. At the top click **Import**
7. Navigate to the root of the project
8. Hit **Import this folder**
9. In the left navigation: click on **Tasks** then **serve**
10. Now click on **Run task**
11. Wait for project **compilation**
12. Click on **Open app** just above the **checkmark**

JSON Server Setup

13. Install JSON Server: `npm install -g json-server`
14. Start JSON Server: `json-server --watch teams.json` (run in `<project>/src/assets`)
